Subject: Building Incident

As you may be aware, on Saturday, March 1st, 2003, a serious incident took place between our two buildings, 1104 and 102, when a disturbed individual drove his Ford Aerostar Van up our front stairs and then proceeded to ram the van into both lobbies, crashing in the doors and some of the frame work. Fortunately no one was hurt in the incident even though it was a weekend shift and others were working at the time. The driver then exited the vehicle and sat in the one of the lobby chairs, spoke irrationally about drugs and death until he was apprehended by police.

Our staff responded appropriately by contacting the authorities, maintaining control and eventually utilizing USC's Hospital on-call craft services to board up the two front entrances. Each entrance was spared a side door which allows employees and the public safe access to the facility. Final repairs will be implemented as soon as possible.

Please let me know if you need additional information.
